

Important Information  
 About Southern California Edison Company's  
 Future Gas Rates on Santa Catalina Island

Southern California Edison Company (SCE) wishes to inform you that your gas bills may increase on March 1, 2011. This is primarily due to increases in the price SCE pays its suppliers for propane used to serve its customers at Santa Catalina Island. On January 28, 2011, SCE filed Advice 172-G, to reflect an increase in the Santa Catalina Island Gas Cost Adjustment Billing Factors, with the California Public Utilities Commission (Commission) requesting that this increased cost of fuel be passed on to customers.

If the Commission approves this advice filing, the following change in rates will become effective for service rendered on and after March 1, 2011.

Customer Group	Present Energy Charge \$/Therm	Revised Energy Charge as of March 1, 2011 \$/Therm
Residential Baseline	\$1.77663	\$2.42003
Nonbaseline	\$1.78870	\$2.54149
Commercial	\$2.07911	\$2.86429
CARE	\$0.06182	\$0.08516

What These Changes Will Mean  
 To Residential Customers

The average residential gas consumption on Santa Catalina Island is 20 therms (a measure of the heat content of gas) per month in the winter, and 14 therms per month in the summer. If this advice filing is approved by the Commission, the average residential customer's monthly bill will increase by approximately \$13.00 or 18.0 percent in the winter, and \$9.00 or 16.0 percent in the summer. However, the actual impact on your bill will vary depending on your energy use.

If the Commission approves Advice 172-G, the revenue increase will be divided among SCE's gas customers as shown below:

<u>Rate Schedule</u>	<u>Therms</u>	Estimated Revenue Change	
		<u>\$</u>	<u>%</u>
Domestic	255,505	\$169,828	17.4%
General Service	338,159	\$273,408	16.5%
TOTAL	593,663	\$443,236	16.9%

## Your Participation Is Welcome

If you would like to communicate with the Commission about Southern California Edison Company's Advice 172-G and the rate changes it would establish, write to the Commission at either of the following offices. Be sure to mention that you are writing specifically about Advice 172-G. You may view a copy of the advice filing at the following Commission offices:

State of California  
Public Utilities Commission  
505 Van Ness Avenue  
San Francisco, CA 94102

or

State of California  
Public Utilities Commission  
320 West 4<sup>th</sup> Street, Ste. 500  
Los Angeles, CA 90013

You may also write Southern California Edison Company about Advice 172-G at the following address or you may view a copy at SCE's business office in Avalon.
