## Stay Safe Around Electricity: Metallic Balloon Safety

- **Keep metallic balloons indoors.** They should always be tied to a weight.
- **Never release them outside.** They can cause electrical outages if they touch wires.
- **Never remove the weight.** Puncture balloons before disposing of them.
- **Stay away and call 911.** Do not attempt to retrieve a balloon or kite tangled in wires.

Visit us at [sce.com/staysafe](http://sce.com/staysafe) for more safety tips. **Stay aware. Stay safe.**

## See a Downed Power Line? Call 911

Stormy weather can cause power lines to fall, creating hazards by electrifying puddles, wet grass, and the surrounding area. Don't approach or touch anyone or anything in contact with a downed power line.

## Be Aware of Potential Payment Scams

- All SCE customers are advised to be aware of potential payment scams.
- We do not have a disconnection department and an SCE agent will not call you to demand payment over the phone.
- We do not request or accept prepaid cards (like money-pack), cryptocurrency (like Bitcoin) or payment apps (like Cash-App, Zelle or Venmo).

To learn more go to [sce.com/scamalert](http://sce.com/scamalert)

## Get the Financial Assistance You Need

We know the past year has been hard for many of our customers. Find out if your business is eligible for a 12-month repayment plan by logging in to your account at [sce.com/myaccount](http://sce.com/myaccount) or by speaking with your Account Manager. Don't have an Account Manager? Call us at **1-800-655-4555**.

## Enroll to Live a Little Greener

SCE provides clean energy choices for homeowners, renters, and businesses looking for renewable energy options without upfront investments, on-site panel installations, building modifications or ongoing maintenance.

- 1) The Green Rate provides the option to purchase green power to support 50% or 100% of your electricity use. To learn more and enroll, visit [sce.com/greenrate](http://sce.com/greenrate)
- 2) The Community Renewables option leverages SCE approved locally operated solar farms to produce electricity. We will give you a bill credit on your monthly SCE energy statement based on your calendar month's kWh subscription in the project. To learn more and enroll in our projects, visit [sce.com/commrenew](http://sce.com/commrenew)

## Be Prepared for Outage Emergencies

If your home or business is located in an area designated as a Tier 2 or Tier 3 high fire risk zone, you may want to consider adding a power station or a portable generator to your emergency preparedness plans. These devices may provide backup power for your personal electronics such as a cell phone, computer, or other important household appliances such as refrigerators, lighting, garage door opener and medical devices which helps you to be more prepared for an outage or other emergency. Rebates are available for the purchase of qualifying products.

Watch our backup power educational videos, learn more about available solutions and apply for rebates in the SCE Marketplace at [sce.com/rebates](http://sce.com/rebates).

To learn more about the process and method the California Public Utilities Commission used to determine High Fire Threat District maps, visit [cpuc.ca.gov/firethreatmaps/](http://cpuc.ca.gov/firethreatmaps/).

## Support for Customers Affected by a Major Disaster

If you or someone you know has been affected by a disaster for which a state of emergency has been declared, please visit [sce.com/disastersupport](http://sce.com/disastersupport) for information about consumer protections, programs and services SCE has available.

## Proposition 65 Warnings

 **WARNING:** The Safe Drinking Water and Toxic Enforcement Act of 1986, commonly referred to as Proposition 65, requires the governor to publish a list of chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. It also requires California businesses to warn the public of potential exposures to these chemicals that result from their operations.

Providing safe and reliable service to all of our customers is a top priority for Southern California Edison and we want you to be aware of these chemicals so that you can reduce exposure to chemicals associated with electricity generation and distribution. We handle all equipment and materials at our sites carefully for your good health as well as ours. However, if you are at or near our facilities and work sites, you can be exposed to the following chemicals on the state's Proposition 65 list. Reduce, limit, or avoid activities at and near the sources of exposure described below. For more information go to:

[www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov)

1. **Diesel Generation:** Diesel Exhaust: SCE uses diesel-fueled emergency generators during emergencies and other times to help minimize the interruption of our customers' supply of electricity. The generators are used at some SCE facilities like substations and service centers, and at locations where repairs are made to the electrical system. SCE also uses diesel as the primary fuel for electricity generation on Catalina Island and in many service vehicles used throughout our service territory. Diesel engines produce exhaust as a by-product of the combustion of diesel fuel. Breathing diesel engine exhaust exposes you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. You should avoid breathing diesel fumes whenever possible.

2. **Wooden Utility Poles:** SCE uses wooden poles that have been treated with chemical preservatives. These chemicals include pentachlorophenol, which is known to the State of California to cause cancer, and petroleum products such as diesel fuel, which contains chemicals including toluene and benzene that are known to the State of California to cause cancer and birth defects or other reproductive harm. If you come into contact with a wooden utility pole or the dust, debris, soil surrounding the pole, or water runoff that may contain dust, debris, and soil previously in contact with the pole, you could be exposed to these chemicals. Avoid contact with wooden utility poles and the dust, debris, soil surrounding the poles, or water runoff that may contain dust, debris, soil surrounding the poles, or water runoff that may contain dust, debris, and soil previously in contact with the poles.

3. **Painted Structures:** SCE utilizes metal and wood structures and equipment that may have been coated with paints containing chemicals, such as lead-based paint, that are known to the State of California to cause cancer and birth defects or other reproductive harm. When the paint on these on these structures deteriorates, flakes of paint can impact the soil adjacent to the structure. To avoid exposure, you should avoid contact with any paint flakes or soil near any structure with deteriorating paint.

## Addendum to SCE Bill Insert

This is to advise all customers who received a paper bill insert between October 16,2021 and November 16, 2021, titled NOTICE OF APPLICATION SOUTHERN CALIFORNIA EDISON COMPANY'S REQUEST TO INCREASE ELECTRIC RATES, Application A.21-09-019, that there was a grammatical error.

On page one, paragraph one titled "WHY AM I RECEIVING THIS NOTICE?", line 9, showed an increase of "\$132,148 million" which should have stated "\$132.148 million"[\$132.148 million" with a period not a comma]. This amount was correctly shown in all electronic versions of this insert.
