**NOTICE OF ADVICE LETTER FILING**  
**Southern California Edison’s Filing to Decrease Water Rates**  
**ADVICE LETTER 122-W**

**Why am I receiving this notice?**

On November 2, 2020, Southern California Edison Company (SCE) submitted an Advice Letter 122-W with the California Public Utilities Commission (CPUC) to update the adopted annual water sales forecast<sup>1</sup> and provide an update on the status of the Water Revenue Adjustment Mechanism (WRAM) and Modified Cost Balancing Account (MCBA).

If the CPUC approves this advice letter, effective December 31, 2020, rates will be recalculated to reflect actual water consumption during Water Year (WY) 2021. This will impact your bill.

**Why is SCE requesting this rate decrease?**

In this advice letter, SCE proposes to update the adopted water sales forecast from 84.2 million gallons (MG) to 83.4 MG per year, a decrease of 0.8 MG or one percent. Additionally, SCE proposes to gradually payoff the net WRAM/MCBA balance as of September 30, 2020 and return the current over-collection to customers via a flat surcredit on the monthly service charge, over an 18-month period.

**How could this affect my water bill?**

If SCE’s advice letter request is approved by the CPUC, the average residential bill with a 5/8” meter would decrease by approximately \$6.79 or 9% per month, \$6.08 or 8% for residential-CARE customers, \$10.90 or 6% for commercial customers, and \$10.44 or 10% for irrigation customers. Table I shows the current and proposed monthly meter service charges. Table II shows the estimated rate increase and average monthly bill for residential customers. Table III shows the estimated rate increase and average monthly bill for non-residential customers:

<sup>1</sup> The annual water sales forecast is updated pursuant to Part R (Consumption Adjustment Mechanism (CAM)) of the Preliminary Statement. Pursuant to AL 117-W, which was approved by Commission on May 15, 2020, SCE is consolidating the annual CAM and WRAM/MCBA advice letter submittals.
