Como Ponerse en Contacto con Nosotros

Para obtener información acerca del proyecto de infraestructura Tehachapi Renewable Transmission Project, por favor visite www.sce.com/trtp. También puede enviar un correo electrónico a trtp@sce.com o llamar a nuestra línea de información gratuita al (877) 795-8787.

Tehachapi Renewable Transmission Project

PROJECT AT-A-GLANCE

The Tehachapi project is a series of new and upgraded transmission facilities spanning approximately 173 miles. The system upgrade is designed to deliver electricity from renewable energy generators in Kern County, as well as power added to the system from traditional generating sources, south through Los Angeles County and east to the existing Mira Loma Substation in Ontario, San Bernardino County.

SCE's Commitment

SCE remains committed to working with communities along the project area to reduce, to the extent possible, the impacts of construction and minimize any inconvenience to residents and businesses during construction. SCE will:

- Limit construction hours to comply with all relevant local regulations to the extent feasible; certain construction activities may require SCE to perform work outside of locally regulated work hours
- Implement dust control, noise abatement and other environmental protection measures
- Provide prior notification to affected property owners of construction activities
- Provide information to local communities on street closures or other activities that could temporarily limit access for area residents and businesses

The TRTP project team regularly coordinates with local first responders on a variety of issues in order to enhance the safety and security of both the public and TRTP construction crews. Above is a photo of one such meeting that took place this past summer at the Vincent Substation in Acton.

- Provide contact information for SCE personnel who are available to answer questions that may arise during construction
- Ensure a safe and secure work environment during construction activities

If you have any questions about the scheduled work or other project-related activities in your neighborhood, please contact us at the project hotline at (877) 795-8787 or visit the TRTP website at www.sce.com/trtp.

Safety Corner

LIGHTS AND OTHER ELECTRICAL DECORATIONS SAFETY

The holiday season is quickly approaching. Many holidays have a happy tradition involving decorations. Below are a few tips to help keep you and your family safe around electricity this holiday season.

DON'T overload outlets or extension cords. Plugging too many appliances or strands of lights into a single outlet can cause them to overheat, which could start a fire.

DO inspect all strands of lights and other electrical decorations before you plug them in. Discard them if they have broken sockets, cracked or frayed cords, bare wires or loose connections.

DON'T connect more than three strands of incandescent holiday lights together. Even better, use LED lights, which consume less electricity and give off less heat.

DON'T hammer nails or tacks through electrical cords when hanging lights.

DID YOU KNOW?

The number of power outages caused by metallic balloons touching power lines in Southern California Edison's service territory in February 2014, compared to 59 in February 2013—a 49 percent drop. In 1990, California law began requiring metallic balloons to be weighted down to reduce balloon-related outages.

GETTING READY TO GO GREEN: UPCOMING CONSTRUCTION ACTIVITIES

During the next three months, TRTP construction activities will include:*

SEGMENT 6

Northern Duarte and the southern portion of Angeles National Forest

- Major construction is complete
- Install FAA safety marker balls (helicopter activity)
- Site stabilization is underway

SEGMENT 7

Access road work:

- From Duarte (north of Las Lomas Road) through Montebello Hills at various sites

Installation of electrical transmission conductor (wire)

- Montebello (north and south of 60 Fwy)

Restoration:

- Throughout segment 7 of the project route

SEGMENT 8

Access road improvements, clearing / grading, and site preparation

- La Habra Heights (west of Fullerton Road)
- Rowland Heights (east of Fullerton Rd and west of 57 Orange Fwy)
- Tonner Canyon (southeast of Diamond Bar)

Installation of electrical transmission structures (towers) and conductor (wires)

- Pico Rivera (south of 60 Fwy / west of 605 Fwy)
- Industry (south of 60 Fwy / east of 605 Fwy)
- Unincorporated Los Angeles County and Hacienda Heights (east and west of Colima Road)
- La Habra Heights (several locations east and west of Hacienda Blvd, north of Powder Canyon, and west of Fullerton Rd)
- Rowland Heights (east and west of Fullerton Road, Pathfinder Park)
- Additional areas of unincorporated Los Angeles County, including Sanitation District and Puente Hills Landfill Native Habitat Preservation Authority

Installation of marker balls

- Several locations throughout Segment 8

SEGMENT 11

City of La Canada-Flintridge and Angeles National Forest

- Access road improvements and work site development (11C)
- Demolition of existing electrical transmission conductor (wires), structures (towers) and foundations (11C)
- Installation of foundations for new electrical transmission towers, including site preparation (11C)
- Assembly and installation of new electrical transmission towers utilizing both conventional equipment and helicopters (11C)
- Installation of new electrical transmission wires (11C)
- Major construction is complete on Segments 11A, 11B & 11D (between La Canada-Flintridge and Monterey Park)

Every effort will be made to reduce the amount of noise generated by activities related to construction. SCE understands that construction may be inconvenient to local residents. We greatly appreciate your patience as we move to complete construction as quickly and safely as possible.

* Please note that the construction schedule is tentative and may change depending on weather and other factors.
